Cost of the Stock Taken Into the Warehouse, by Year

Fawaz Trading & Engineering Services - Trading Division, Copper and Spare Parts. Each order valued at its own (LME + fabrication) x tonnes, counted in the year it landed. 1 USD = 0.308 KWD. Approximate.

Year	Tonnes into the warehouse	Average rate ($/t)	COST FOB ($)	COST FOB (KWD)	With customs 5% ($)	With customs 5% (KWD)	Still at sea 31 Dec (MT)	Value at sea ($)
2021	85.409	11,343	968,822	298,397	1,017,263	313,317	38.450	426,578
2022	184.753	10,783	1,992,102	613,567	2,091,707	644,246	43.299	447,612
2023	168.958	9,893	1,671,560	514,840	1,755,138	540,583		
2024	107.199	10,931	1,171,839	360,926	1,230,431	378,973	85.349	905,953
2025	162.471	10,669	1,733,380	533,881	1,820,049	560,575	52.910	649,516
2026	189.726	13,912	2,639,451	812,951	2,771,424	853,598		
TOTAL	**898.516**	**11,327**	**10,177,153**	**3,134,563**	**10,686,011**	**3,291,291**		

AVERAGE PURCHASE PRICE - ORDER YEAR AGAINST RECEIPT YEAR

Year	By ORDER year ($/t)	By RECEIPT year ($/t)	Difference ($/t)	By receipt year +5% ($/t)	Tonnes ordered	Tonnes landed		What the gap says
2021	11,266	11,343	77	11,911	123.859	85.409		Much the same either way
2022	10,618	10,783	165	11,322	189.602	184.753		What landed was bought dearer - it came from the previous year
2023	9,740	9,893	153	10,388	125.659	168.958		What landed was bought dearer - it came from the previous year
2024	10,791	10,931	140	11,478	192.548	107.199		What landed was bought dearer - it came from the previous year
2025	11,358	10,669	(689)	11,202	130.032	162.471		What landed was bought cheaper - the dear orders had not arrived yet
2026	14,545	13,912	(633)	14,608	136.816	189.726		What landed was bought cheaper - the dear orders had not arrived yet
2021-26	**11,327**	**11,327**	**0**	**11,893**	**898.516**	**898.516**		**Over six years the two bases meet**

WHAT IS SITTING THERE NOW - 05-11-2026

Position	Tonnes	Rate ($/t)	Value FOB ($)	Value FOB (KWD)	With customs ($)	With customs (KWD)		Basis
In the wareh	10.717	14,545	155,874	48,009	163,668	50,410		copper_stock_vs_orders.xlsx, 2,438 pcs
At sea - NW	47.563	14,545	691,785	213,070	726,374	223,723		the two August 2026 orders, 11,542 pcs
Mueller, land	14.000	14,545	203,624	62,716	213,806	65,852		no price in the source - 2026 rate used
Total coppe	**72.280**	**14,545**	**1,051,284**	**323,795**	**1,103,848**	**339,985**		**valued at the 2026 average rate**

NOTES

1. The average rate in the table above is on RECEIPT year: the mix of the orders that landed in the year. The block below sets it against the order-year average, which is what 1-Order Detail of copper_lme_average shows. For costing what was sold, receipt year is the right basis.
2. This is the cost of what CAME IN each year, not the closing stock on 31 December. Closing stock needs what was sold in the year, which is not in any file here - send the sales and it can be worked out.
3. Each order is valued at its own LME plus fabrication, 1,600 $/t Nungwon and 700 $/t Toan Phat, so a year's average rate is the mix of the orders that landed in it, not the orders placed in it.
4. Receipt years for 2024-2026 come from the purchase sheet. For 2021-2023 there is no receipt column, so the pattern the later years show is applied: an order placed to September lands the same year, October onward lands the next. Those are the rows marked estimated in 1-Order Detail.
5. 2021 is understated. Anything bought in late 2020 that landed in 2021 is not in the source sheet, which starts in January 2021.
6. The 8.000 MT local purchase and the 14.000 MT Mueller order carry no price anywhere. Both are valued at the 2026 Nungwon weighted rate of 14,545 $/t - yellow in 1-Order Detail. The local tube and the Bahrain tube almost certainly cost more than Korean FOB, so those two lines are the softest figures in the file.
7. Customs of 5% is a separate column. Freight and insurance are NOT included - the landed cost in copper_cost_comparison adds those before customs, so the true landed figure is above the "with customs" column.
8. "Still at sea 31 Dec" reads nil for 2026 because the two orders that carry into 2027 - the Nungwon order of 08-11-2026 and the one planned for 22-11-2026, 44.640 MT together - have no LME yet and are not in the price sheet. Price them when the proforma comes and they add to the 2027 column.
9. Toan Phat weights here follow the price sheet: 21.653 and 20.967 MT on the 2024 orders. copper_purchase_vs_receipt uses the purchase sheet's 21.600 and 20.900, so the two files differ by 0.053 MT in 2024 and 0.067 MT in 2025. Immaterial to the cost, but that is why the tonnage is not identical.

Every Order Valued - Grouped by the Year It Landed

Yellow cells are assumed: an LME read off the Nungwon curve, or a rate for material with no price in any source. Overwrite them and the yearly cost follows.

#	PO #	Factory / source	Ordered	Landed year	Tonnes	LME ($/t)	Fab ($/t)	Rate ($/t)	COST FOB ($)	With customs ($)	Note
