Copper tube: our share of the Kuwait market

HS 7411.10-00, tubes and pipes of refined copper
2018 to 2025, with a forecast for 2026 · 13 November 2026

Our share of the trading market, 2025
12.6%
158 t sold out of 1,256 t that reaches the traders

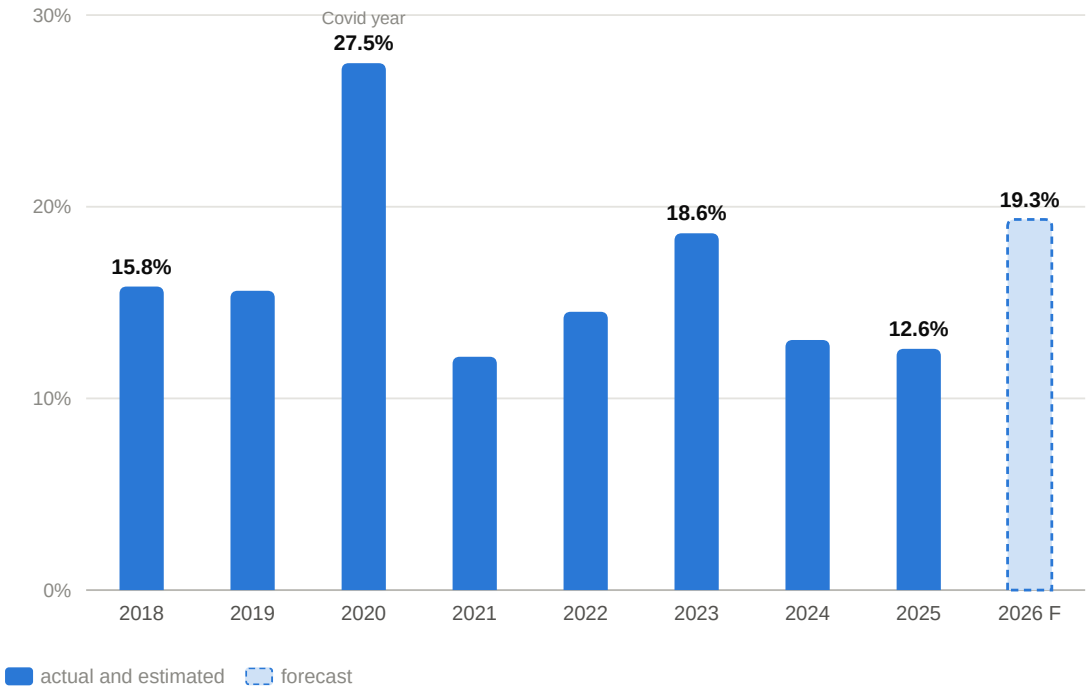

Share forecast, 2026
19.3%
166 t in a market cut by the Hormuz closure

Kuwait imports, 2025
4,038 t
+70% since 2018

Our tonnes sold, 2026
166 t
+5% on 2025, counted to 11 November

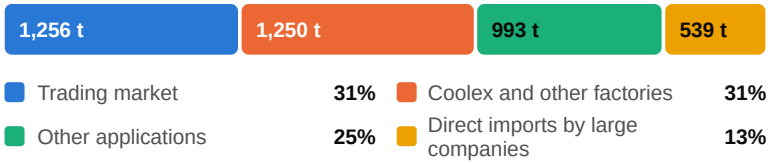

Our share of the trading market

Fawaz tube and coil sold as a share of the tonnes that reach Kuwait's traders

Where Kuwait's 4,038 t went in 2025

Less than a third of what is imported reaches the trading market

- Trading market **31%**
- Coolex and other factories **31%**
- Other applications **25%**
- Direct imports by large companies **13%**

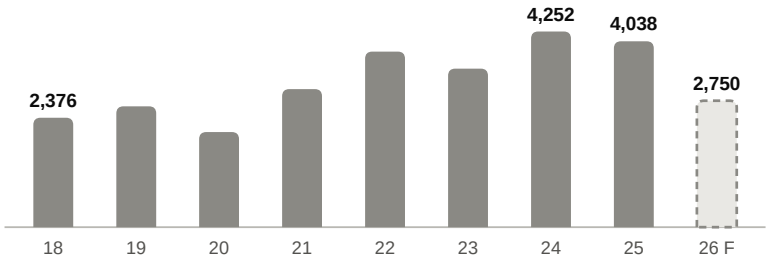

Inside the trading market

Fawaz holds 12.6% of the 1,256 t sold through traders

Total Kuwait imports by year

Tonnes, 2018 to 2025 and the 2026 forecast

The figures by year

Tonnes · HS 7411.10-00

Year	Total Kuwait imports	Coolex and other factories	Other applications	Direct imports by large companies	Trading market	Our tonnes sold	Our share of the trading market	Our share of total imports
2018	2,376	736	584	317	**740**	117	**15.8%**	4.9%
2019	2,624	812	645	350	**817**	128	**15.6%**	4.9%
2020	2,067	640	508	276	**643**	177	**27.5%**	8.5%
2021	3,000	929	738	400	**933**	114	**12.2%**	3.8%
2022	3,815	1,181	938	509	**1,187**	172	**14.5%**	4.5%
2023	3,443	1,066	847	459	**1,071**	199	**18.6%**	5.8%
2024	4,252	1,316	1,045	567	**1,324**	173	**13.0%**	4.1%
2025	4,038	1,250	993	539	**1,256**	158	**12.6%**	3.9%
2026 forecast	2,750	851	676	367	**856**	166	**19.3%**	6.0%

What the figures say

- **Only about 31% of Kuwait's imports reach the trading market.** The rest goes into factories, non-AC uses and companies that import for themselves.
- **We hold 12.6% of that market** in 2025, and roughly a third of all Korean-origin tube entering Kuwait passes through us.
- **The market grew 70% from 2018 to 2025;** our volume grew 35%, so our share moved from 15.8% to 12.6%.
- **2026:** imports fall to about 2,750 t while our sales rise to 166 t, sold largely from stock bought before the closure.

How the figures are built

- **Total imports** are UN Comtrade data reported by Kuwait. 2026 is not published; it is taken at 2,750 t, about four months lost to the Hormuz closure.
- **Factories** are Coolex at 1,000 t and other factories at 250 t in 2025. **Other applications** are 25% of imports. **Direct imports** are 30% of the remainder. All three are estimates and move each year with total imports.
- **Our tonnes:** 2025 and 2026 are counted item by item from the stock movement (2026 to 11 November, annualised). 2018 to 2024 are estimated from revenue at a 17% gross margin; 2018 is eight months annualised.
- **2020 and 2021** are the least reliable years.
