Tonnes of Copper Sold - 2024, 2025, 2026

Ahmed Nabil Mohamed Abdalla. Copper cost of sales divided by the average cost a tonne of the material that landed in the year. Cost = (LME + fabrication) + 1% freight + 5% customs, except Mueller which comes from Bahrain and carries neither. 1 USD = 0.308 KWD.

Year	Copper COGS (KWD)	Cost per tonne bought that year (KWD/t)	TONNES SOLD	Cost $/t FOB	For reference: MT landed	Note
2024	647,406	3,571	181.3	10,931	107.2	From your Sales Analysis Report
2025	631,623	3,485	181.3	10,669	162.5	From your Sales Analysis Report
2026	**750,500**	4,525	165.9	13,863	189.7	950,000 sales at a 21% margin - your projection
3 years	**2,029,529**	**3,841**	**528.4**		**459.4**	**Average 176.1 MT a year**

1. Tonnes sold = your copper COGS divided by the average cost a tonne of the material that LANDED that year, which is the material sold out of.
2. Cost a tonne = (LME + fabrication) x 1% freight x 5% customs, at 1 USD = 0.308 KWD. Nothing else is added.
3. The Mueller order carries NO freight and NO customs - it comes from Bahrain. Its cost is the LME of 14,450 plus 1,600 fabrication, 16,050 $/t flat. Everything else carries the 1% and the 5%.
4. Only 15% of the Mueller order is expected to sell - 2.100 MT of the 14.000 - so it is weighted at 2.100 MT in the 2026 average and the other 11.900 MT stays in stock. At the full 14.000 MT the 2026 cost would be 4,551 KWD a tonne instead of the figure shown.
5. COGS is yours as printed: 647,406.340 KWD in 2024 and 631,622.779 in 2025, from the Sales Analysis Reports of 10-11-2026, sub profit centre TRDACREF. 2026 is the 950,000 KWD close at a 21% margin, so 750,500.
6. The whole of your COGS is treated as copper tube. If any of it is fittings or other material, give the split and the tonnes come down in proportion.
7. Mueller is priced at the LME of 14,450 given, with fabrication at 1,600 $/t. The 8.000 MT local purchase is taken at 14,000 $/t, the weighted rate of the other 2026 landings.
8. "MT landed" is what the whole company took in that year, for comparison. In 2024 you sold more than landed - that came out of the 169 MT that landed in 2023.
