Copper Sold and Average Cost per Tonne - 2024, 2025, 2026

Fawaz Trading & Engineering Services - Trading Division, Copper and Spare Parts. Cost = LME + fabrication, on the year the material landed. 1 USD = 0.308 KWD.

Year	TONNES SOLD	Cost $/t FOB	Cost $/t +5% customs	COST KWD/t +5% customs	Total cost (KWD)	Comment
2024	107.2	10,931	11,478	3,535	378,976	
2025	162.5	10,669	11,202	3,450	560,675	
2026	189.7	14,000	14,700	4,528	858,888	Full year to 31-12-2026
3 years	**459.4**	**12,106**	**12,711**	**3,915**	**1,798,569**	**Average 153.1 MT a year**

1. Tonnes sold is taken as the tonnes that landed. The warehouse holds 10.717 MT against an offtake of about 11.75 MT a month - under one month of cover - so what lands is sold within weeks and the two track each other.
2. Cost is LME plus fabrication: 1,600 $/t Nungwon, 700 $/t Toan Phat, 1,600 $/t Mueller. Mueller LME is 14,450 as given; the 8.000 MT local purchase is taken at 14,000 $/t, the weighted rate of the other 2026 landings.
3. Customs of 5% is in. Freight and insurance are not - they add about 2% on top.
