Copper Purchase vs Warehouse Receipt - Summary

Fawaz Trading & Engineering Services - Trading Division, Copper and Spare Parts. Plan to 31-12-2026. Source: Copy_of_copper_sheet_Sheet_up_to_date.xlsx, sheet "Working". Weights in metric tonnes.

Three-year totals, plan to 31-12-2026			
Purchase 2024-2026 (MT)	503.916		26 orders, 3 factories
Receipt in the warehouse (MT)	459.276		everything landing by 31-12-2026
Carried into 2027 (MT)	44.640		2 Nungwon orders, 4,647 pcs + planned
Purchase average per year (MT)	167.972		full years
Receipt average per year (MT)	153.092		full years
Year by year - purchase against receipt			
2024 - purchased / received (MT)	192.428	107.146	9 orders; the first 5 landed in 2024
2025 - purchased / received (MT)	130.032	162.404	purchases cut 32%, receipts peaked
2026 - purchased / received (MT)	181.456	189.726	plan: the full year to 31-12-2026
Of the 2026 receipt, where it stands today			
Already in the warehouse (MT)	128.163		landed by 10-11-2026
At sea, landing now (MT)	47.563		NW-260917E + NW-261006A, 11,542 pcs
Arriving about 24-11-2026 (MT)	14.000		Mueller, Bahrain - 2 weeks away
Factories			
Nungwon Metal Ind. - purchase share	85.0%		428.416 MT over three years
Toan Phat Copper Tube - purchase share	10.6%		53.500 MT, nothing since 10-11-2025
Mueller Middle East - purchase share	2.8%		14.000 MT from Bahrain, 2-week lead
Against consumption			
Yearly consumption per copper_master (MT)	109.792		9.15 MT per month
Implied offtake from the receipts (MT/yr)	135.299		11.27 MT per month - see note 9
2026 receipt less consumption (MT)	79.934		see note 10

NOTES

1. PLAN BASIS: 2026 is stated as a full year to 31-12-2026. Everything due to land inside 2026 is counted as received, including the two shipments at sea (47.563 MT) and the Mueller order (14.000 MT), and everything placed in 2026 is counted as purchased, including the two orders that land in 2027. Sheet 1 also shows where the 2026 receipt actually stands at 10-11-2026.
2. Purchase year is the date on the purchase order. Receipt year is the year the material is taken into the warehouse, from the "note" column of the source sheet.
3. The two columns differ because of the 3.5-month lead time (1.5 manufacturing + 2.0 at sea). An order placed in October or later lands the following year, so purchase and receipt never match inside one year. The gap is material crossing the year end, and it reconciles in full on sheet 1.
4. CONFIRMED: the first five orders - PO-100053275, PO-100055444, PO-100056642, PO-100056541 and PO-100058776, 107.146 MT - were received in 2024. They carry no note in the source sheet.
5. 61.563 MT of the 2026 receipt is not in the warehouse yet, but both parts are firm for 2026: 47.563 MT at sea on the two Nungwon shipments, and the 14.000 MT Mueller order, which ships from Bahrain and lands about 24-11-2026, five weeks before the year end.
6. LEAD TIME IS NOT THE SAME FOR ALL THREE FACTORIES. Nungwon ships from Korea on a 3.5-month lead (1.5 manufacturing + 2.0 at sea). Mueller is in Bahrain and delivers in about two weeks. That is why the Mueller order of 02-10-2026 lands inside 2026 while the Nungwon order of 08-11-2026 does not land until February 2027.
7. In transit at 01-01-2024 is assumed nil. The source sheet starts at January 2024, so any 2023 purchase that landed in 2024 is not in the file and 2024 receipts may be understated.
8. The source sheet types "Total 2025" as 130 and "Total 2026" as 181.46. The true sums are 130.032 and 181.456. Only "Total 2024" is a live formula.
9. The "Working (2)" sheet disagrees with "Working" on the two Toan Phat orders: PO-100056541 is 21.653 MT / 5,237 pcs dated 12-05-2024 there against 21.600 MT / 5,222 pcs dated 15-05-2024, and PO-100062435 is 20.967 against 20.900 MT. "Working" is used here, giving Toan Phat 53.500 MT against the 53.620 MT on that sheet.
10. CHECK THIS: 397.713 MT has physically landed since January 2024 and the warehouse holds 10.717 MT, so about 386.996 MT has gone out over 34.3 months - 11.27 MT a month, or 135.3 MT a year. copper_master works on 9.15 MT a month. Real offtake looks about 23% higher than the figure the order sizing is built on, which would cut the 2.8-month cover to roughly 2.2 months. Assumes the warehouse was empty at 01-01-2024
11. On the plan basis 189.726 MT lands in 2026 against 109.792 MT of yearly consumption - a 79.934 MT surplus in one year - yet free stock after the seven open orders is only 25.241 MT. Both cannot be right, and the 2026 receipt is now firm, so the consumption figure is the one to re-check. See note 10.
12. WORTH CHECKING: copper_master has 11 of 18 moving sizes running out before the Korean shipment lands on 22-02-2027, with a shortfall of 13.315 MT. The Mueller order is 14.000 MT landing about 24-11-2026 - near enough the same tonnage, three months earlier. Put its size breakdown against the shortage list; if the sizes match it closes the gap, and the February shipment stops being critical.
13. The Nungwon order under progress is 4,647 pcs / 22.640 MT in the source sheet, but the issued order in this folder (nungwon_order_23mt, ref FTE/NWM/2026-11 of 08-11-2026) is 4,897 pcs / 23.400 MT. The source figure is kept; update it once the proforma is confirmed.
14. The local purchase of 8.000 MT has no purchase order, no date and no piece count. It is not factory supply and is shown on its own line in 3-By Factory.

Purchase and Warehouse Receipt by Year - Plan to 31-12-2026

Purchase is counted on the order date. Receipt is counted in the year the material enters the warehouse, with everything due in 2026 counted as received. The gap between the two columns is material crossing the year end.

Year	PURCHASE Orders	PURCHASE Pieces	PURCHASE MT	RECEIPT Shipments	RECEIPT Pieces	RECEIPT MT	Receipt less Purchase (MT)	Comment
2024	9	47,249	192.428	5	25,436	107.146	(85.282)	The first 5 orders landed in 2024; 85.282 MT crossed into 2025
2025	8	30,357	130.032	8	38,731	162.404	32.372	Purchases cut to 130 MT, but 85.282 MT arrived from 2024
2026	9	35,337	181.456	11	44,129	189.726	8.270	Plan year. 61.563 MT of the receipt is not in yet - see below
TOTAL	**26**	**112,943**	**503.916**	**24**	**108,296**	**459.276**	**(44.640)**	**The 44.640 MT difference is the two orders that land in 2027**

HOW THE TWO COLUMNS RECONCILE

Year	Not received 1 Jan (MT)	Purchased in year (MT)		Received in year (MT)	Not received 31 Dec (MT)	Check		Basis
2024	0.000	192.428	less	107.146	85.282	OK		opening + purchased - received = closing
2025	85.282	130.032	less	162.404	52.910	OK		opening + purchased - received = closing
2026	52.910	181.456	less	189.726	44.640	OK		opening + purchased - received = closing

THE 2026 RECEIPT OF 189.726 MT - WHERE IT STANDS AT 10-11-2026

Status	Shipments	Pieces	MT	Share of the 2026 receipt				Note
In the wareh	8	29,235	128.163	67.6%				
At sea, landi	2	11,542	47.563	25.1%				Both shipments still at sea on 05-Nov-2026
Arriving abou	1	3,352	14.000	7.4%				Mueller, from Bahrain - about 2 weeks
Total 2026 re	**11**	**44,129**	**189.726**	**100.0%**				**All three parts are firm for 2026**

NOTES

1. Plan basis: everything due to land inside 2026 counts as received in 2026, and everything ordered in 2026 counts as purchased in 2026 - including the two orders that land in 2027, which is why purchase exceeds receipt by 44.640 MT.
2. Mueller ships from Bahrain on a two-week lead, not the 3.5 months Nungwon needs from Korea, so its order of 02-10-2026 lands about 24-11-2026 - inside the plan year with five weeks to spare.
3. Pieces exclude the 8.000 MT local purchase and the 22.000 MT planned order, which carry no piece count.
4. The first five orders of 2024, 107.146 MT, were received in 2024 - confirmed by the buyer.
5. Not received at 01-01-2024 is assumed nil; the source sheet begins in January 2024.

Every Order - Purchase Year against Receipt Year

26 orders. The last three columns are what was added to the source sheet: the purchase year, the receipt year, and where the material physically is at 10-11-2026.

#	Order	Factory / source	Order date	Pieces	Weight (MT)	Purchase year	Receipt year	Where it is at 10-11-2026	Note
Purchased in 2024

	Total 2026			**35,337**	**181.456**				**Received in 2026: 189.726 MT**
	GRAND TOTAL			**112,943**	**503.916**				**Received 2024-2026: 459.276 MT**

NOTES

1. Amber rows are not in the warehouse at 10-11-2026. "At sea" is shipped and in transit, "Arriving" lands within days, "Ordered" is placed but not shipped, "Planned" is not placed.
2. Receipt year for the two shipments at sea and the Mueller order is 2026. The source sheet marks the two shipments "Received 2026" and the Mueller order "will receive 2026"; Mueller ships from Bahrain and lands about 24-11-2026.
3. The five 2024 orders with no note were received in 2024 - confirmed by the buyer.
4. The two orders of 08-11-2026 and 22-11-2026 are purchases of 2026 that land in 2027, which is the whole of the 44.640 MT by which 2024-2026 purchases exceed receipts.

Purchase and Receipt by Factory - Three Factories

Nungwon Metal Ind. (Korea, 3.5-month lead), Toan Phat Copper Tube (Vietnam) and Mueller Middle East (Bahrain, about 2 weeks). The 8.000 MT local purchase is not factory supply and is listed on its own.

Factory	Year	Orders	Purchased (MT)	Received (MT)	Share of year's purchase	Comment
2024						
Nungwon Metal Ind. Co., Ltd.	2024	7	149.928	85.546	77.9%	7 orders, one about every 7 weeks
Toan Phat Copper Tube JSC	2024	2	42.500	21.600	22.1%	2 orders, 22% of the year
Mueller Middle East (Bahrain)	2024					Not used this year
Total 2024	**2024**	**9**	**192.428**	**107.146**	**100.0%**	**Received includes material ordered the year before**
2025						
Nungwon Metal Ind. Co., Ltd.	2025	7	119.032	141.504	91.5%	7 orders but smaller - two under 10 MT
Toan Phat Copper Tube JSC	2025	1	11.000	20.900	8.5%	1 order, the last one placed with them
Mueller Middle East (Bahrain)	2025					Not used this year
Total 2025	**2025**	**8**	**130.032**	**162.404**	**100.0%**	**Received includes material ordered the year before**
2026						
Nungwon Metal Ind. Co., Ltd.	2026	7	159.456	156.726	87.9%	7 orders; 2 of them land in 2027
Toan Phat Copper Tube JSC	2026			11.000		No new order; 11.000 MT landed from the 2025 order
Mueller Middle East (Bahrain)	2026	1	14.000	14.000	7.7%	First order - 14.000 MT, lands about 24-11-2026
Local purchase	2026	1	8.000	8.000	4.4%	No PO, date or piece count in the source
Total 2026	**2026**	**9**	**181.456**	**189.726**	**100.0%**	**Received includes material ordered the year before**
Three years together						
Nungwon Metal Ind. Co., Ltd.	2024-26	21	428.416	383.776	85.0%	85% of the programme. 44.640 MT of it lands in 2027
Toan Phat Copper Tube JSC	2024-26	3	53.500	53.500	10.6%	11%. Everything ordered has landed. Nothing since 10-11-2025
Mueller Middle East (Bahrain)	2024-26	1	14.000	14.000	2.8%	3%. Bahrain, 2-week lead - the short-notice source
Local purchase	2024-26	1	8.000	8.000	1.6%	Bought and received inside 2026
GRAND TOTAL	**2024-26**	**26**	**503.916**	**459.276**	**100.0%**	**Purchase less receipt = 44.640 MT carried into 2027**

NOTES

1. Three factories supply the tube: Nungwon Metal Ind. (Korea), Toan Phat Copper Tube (Vietnam) and Mueller Middle East (Bahrain). Mueller is the newest - its first order, 14.000 MT of 02-10-2026, lands about 24-11-2026.
2. Mueller is the only one of the three inside the Gulf. Two weeks from order to delivery against 3.5 months from Korea makes it the source to use for a size that runs out before a Nungwon shipment can land, even if the price per kg is higher.
3. Nungwon is 85% of three years of purchasing. Toan Phat has not been given an order since 10-11-2025, and the Mueller order is the first move to spread that.
4. The 8.000 MT local purchase is not factory supply. It is kept in the totals because it was bought and received, but it is shown on its own line.
5. Toan Phat weights follow the "Working" sheet and total 53.500 MT. The "Working (2)" sheet totals 53.620 MT for the same three orders - see 0-Summary note 8.
